JAMES S. WEYMOUTH BENRY W. GILMAN of JOSEPH Y. WEYMOUTH Upper Gilmanton.

EDGAR A ROWE Auditors.

Report of the School Committee.

District No. 1—Summer term. This teacher came to her school aided by much valuable experience and ranks among the best teachers in town. At my first, and also my last visit there was much interest manifested by the pupils. Improvement highly satisfactory.

Winter term. The preceding remarks apply to the winter term. Miss Pearsons manifested energy, and industry which

are essential to success. School still in sesion.

District No. 2—Summer term. At my first visit the school appeared very well. Most of the scholars seemed well disposed and earnestly engaged in their studies. I was not

notified of its close, so did not visit it but once.

Fall term. This term was taught by the same teacher. At my first visit the teacher was absent on account of sickness, and the school was conducted by Miss Belinda A. Bean, who manifested industry, perseverance, and thoroughness; which are the essentials of success. At my last visit order was not so good as desirable.

District No. 3—Summer term. This school was not visited but once as I was not notified of its close. This was Miss Copp's first attempt at teaching, and I should judge from the appearance of the school, that more energy was needed on the part of the teacher, to secure success. The imperfect manner in which the school register was kept, showed a great lack of thoroughness on the part of the teacher.

Winter term. The general appearance of this school was good, particularly so far as order, discipline, and duties of the teacher were concerned. I found here some good scholars, studious and persevering; others more dull and less attentive. The general progress of the school was highly

satisfactory.

District No. 4—Summer term. I cordially approve of the systematical manner in which the teacher instructed her pupils. Here I found some fine little scholars, and at my

last visit they did honor to themselves and teacher.

Winter term. Teacher an excellent scholar, but she lacked in faculty to govern so large a school. I cannot report any thing in regard to the advancement made in the school, as I was not notified of its close. It would be for the interest of this school to have a male teacher to teach the winter term.

District No. 5—Summer term. Miss Pearson, is an experienced and successful teacher. She has the faculty of imparting instruction, and of gaining the attention and good will of her scholars. At my last visit the scholars were

deeply interested in their studies. Order and improvement

very good.

Winter term. Mr. Sanborn came to his school aided by much valuable experience, which enabled him to secure a systematic course of mental disceptine, as every feature of his school indicated. To a stand and practical progress the the teacher seemed to direct all his energies, and labored with an unflinching fidelity, to accomplish it. Anyancement highly satisfactory. I congratulate the district in being so fortunate in procuring teachers the past year.

District No. 6—Summer term. This was Miss Blaisdell's first attempt to teach. She needs more energy to sustain

good order. Advance nent not so good as desirable,

Winter term. This is quite a hard school to govern for a small school. The teacher seemed willing and tauthful, and he was successful in gaining the attention and good will of the most of his scholars. He remarked in his report: "There were one or two illdisposed scholars and these were obliged to stay at home, after which, there was a very much better disposed school." Also: "There are two scholars, John Small, and Lucy Kimball, whose names I wish to come before the town, because of their good moral deportment and strict observance to the rules of school." Order and improvement of this school good.

District No. 7—Summer term. The discipline and improvement of this school was very good. The teachers want of experience was in a measure made up by her faithfulness.

and will I think make a good teacher.

Winter term. Miss Tebbetts has eminent literary qualifications, which with her experience enables her to take a high rank among the first class of teachers. She possesses energy in a good degree, which she infused into her school in all its departments. Order and improvement good.

District No. 8—Fall term. This district had but one term of school during the year, which was taught by Miss Pearsons. She has done a good work here, and has added to her former reputation.

District No. 9—Summer term. This school is composed mostly of young scholars, yet their close application to study, and proper observance of good discipline, have won for them high commendation. Ceacher thorough and experienced. Had an easy way of gaining the good will of her scholars, and therefore she had no difficulty in accomplishing that most desired end, a good school.

Winter term. This was Miss Porter's first attempt to teach, and she manifested great interest for the improve-

ment of her school, yet the order was not so good as is essential to success.

District No. 10—Summer term. This is a small school of small scholars. The teacher by her energy and interest, rendered the school pleasant and profitable. Advancement highly satisfactory. This school made the best progress in reading of any school in town.

Winter term. Miss Blaisdell commenced her school with decision and energy, and had the parents co-operated with the teacher, the school would have been a decided success.

District No. 11—Summer and winter terms taught by the same teacher. Miss Bean is an experienced and well qualified teacher. At the close of the same term there was more interest maniested than could be expected under the circumstances, as there was but four scholars attended this term. Order and improvement good. At the commecement of the winter term, a few large scholars came in, and made the school more interesting. At my last visit the scholars manifested great interest in all the departments. Order and improvement highly satisfactory.

District No 12—This district had but one term. This school emphatically demands the commendation of all interested. Not only does the teacher merit this, but the most of the scholars should receive a prominent share. Miss Currier helongs to the first class of teachers; and deserves the confidence of all who feel an interest in the cause of education

There has been twenty-two schools in town this year. The most of them have been successful. Prudential Committees should exercise great care in selecting their teachers, and not hire those that are not capable, because they are their triends. One of the most impartant things in a school, and at the same time the most difficult to secure, is good order. Your Committe has felt that if our teachers, or any one of them, were liable to criticism, it would be upon this point. It has been apparent in several schools that the discipline was not what their interests required. There are two important departments in education, the family and the school. If we have a good school it may be ruined by the evil influences of the It we have a poor school it is not a proper way for the parents to talk of the imperfections of the school, and teacher before their children; this not only runs the school, but has a tendency to ruin their children. If more of the parents would teach their children obedience at home, we should have less disorderly schools; then if we should have a poor school there should be proper measures taken to have the teacher discharged. Parents, upon you depends the moral training of the rising generation.
